Abhayveer Dhiman

Computer Science Student | Seeking Software Development Co-op

587-989-8283 | dhimanabhayveer@gmail.com | LinkedIn | GitHub

Professional Summary

Computer Science student at Wilfrid Laurier University with experience in React development, Java backend contributions, automated testing, and collaborative GitHub workflows. Built applications used in farm and vendor operations and contributed to healthcare software at Worky.

Professional Experience

Worky | June 2025–September 2025
Software Development & Growth Intern

- **Automated testing:** Built frontend tests for a React and TypeScript application using Vitest, React Testing Library, and Playwright to validate application functionality and user workflows.
- **AI-assisted testing:** Created a reusable agentic skill for frontend testing with Cursor Browser mode to support browser-based application checks.
- **Collaborative development:** Submitted pull requests, participated in code reviews, and worked with senior engineers to resolve merge conflicts using Git and GitHub.
- **Backend and data:** Contributed to a Java medication-management endpoint and performed manual database work supporting application development.
- **Debugging and client collaboration:** Fixed a worker geolocation-tracking bug; worked with clients to reproduce reported issues and senior engineers to investigate root causes and implement fixes.
- **API integration and automation:** Integrated Apollo and Lusha APIs for lead enrichment, helped build lead-generation and web-scraping tools, and configured outbound pipelines using Instantly.ai and Apollo.

Shirley's Greenhouse | June 2024–Present
Farm Operations & Market Coordinator

- **Market operations:** Coordinated farmers' market preparation, tent setup, stall management, and communication to support day-to-day market activities.
- **Sales and financial tracking:** Sold products, communicated with customers, and tracked revenue and expenses to support operational planning.
- **Farm logistics:** Supported seasonal planting, inventory coordination, packing, and deliveries; operated tractors, forklifts, and other farm machinery.

Projects

Applications built for Shirley's Greenhouse and used in live farm and market operations.

Vendor Sales & Financial Dashboard
React · Google Sheets

- Built a React application used by market vendors to track sales, revenue, and expenses during ongoing operations.
- Organized vendor financial information to support market segmentation and future investment planning.

Planting & Weather Dashboard
React · Google Sheets

- Developed a weather-tracking dashboard used in farm operations to support seasonal planting decisions and scheduling.
- Consolidated weather and planting information through a React interface connected to Google Sheets.

Inventory & Delivery Dashboard
React · Google Sheets

- Built a dashboard used to manage inventory, packaging, and deliveries supporting real client and vendor orders.
- Connected the React application to Google Sheets to organize inventory information for daily order preparation and fulfillment.

Technical Skills

Languages & frameworks: Java, TypeScript, React
Testing: Vitest, React Testing Library, Playwright, Cursor Browser mode
Development: Git, GitHub, pull requests, code reviews, merge-conflict resolution, API integration, debugging
Data & automation: Manual database operations, Google Sheets data structuring, web scraping, Apollo API, Lusha API, Instantly.ai

Education

Wilfrid Laurier University | 2026–2030
Computer Science | Expected graduation: 2030
